## TMS320 JTAG Emulator

**Price per Unit (piece): \$999.00**

FudanTech FDS510PP supports all TI DSP families, including TMS320 and OMAP families, such as TMS320C2000 Series, TMS320C3000 Series, TMS320C5000 Series, TMS320C6000 Series, etc. FudanTech FDS510PP Software compatibility with all versions of Code Composer and Code Composer Studio including v2.2 and above, assures existing and future device compatibility for legacy or new DSP's right out of the box with no upgrades required.

FudanTech FDS510PP includes support for Code Composer v4.1x and CCStudio v1.2 gives users access and compatibility to VC33, C20x and C24x. The FDS510PP JTAG Emulator is also compatible with Code Composer Studio™ Flash-burner utility. We also provide free technology support and service.

## Main Features

1. Supports Texas Instruments all DSP families and OMAP families, including TMS320C2000 Series, TMS320C3000 Series, TMS320C5000 Series, TMS320C6000 Series, C3X, C4X, C5X, C8X and OMAP families, etc.
2. JTAG/MPSD standard Debug port.
3. Support multi-DSP parallel debug.
4. Support Texas Instruments Code Composer Studio IDE any Version, such as CCS V2.0, V2.1, V2.2, V3.1, and V4.1
5. Standard 14-pin JTAG Header Connector
6. Support Windows® 98, ME, 2000, XP
7. Support 3.3V/5V Volt DSP Device
8. Does not use any of the target's resource
9. Support DSP Flash programming for F28x/F240x/F24x/F20x
10. Ultra compact designed pod with status LED
11. The most compact and lightweight JTAG emulator available
12. Low price, high performance

Here is a partial listing of TMS320 processors this TMS320 JTAG emulator supports:
